

Internet Fax Service

Send and Receive Faxes
Anywhere you Access Your
Email, the Internet, even
your smart phone!

As Simple to use as Email

Send a fax online

- 1 Open new email
- 2 Recipient's number +@myfax.com
- 3 Attach document you want to fax
- 4 Send!

Receiving a fax

- 1 Send faxes to your number
- 2 Fax is delivered to your email
- 3 Open email!

MyFax is the ideal solution - it eliminates fax machines, fax servers and everything that goes with them like:

- supplies,
- 2nd phone lines,
- and long distance charges.

MyFax saves up to 75% off the cost of faxing with a traditional fax machine!

- Easy to use as email.
- Ultimate flexibility.
- Enhanced mobility.
- Increased reliability.
- No more busy signals.
- No more waiting!

MyFax is:

Convenient and Cost Effective

No additional hardware, software or telephone lines needed. Confident delivery – automatic redials and email confirmation. Stay in touch with clients, keep accurate records, and receive transaction-based information and contracts from wherever you access your email.

Efficient – Streamline Workflows

Easily manage incoming and outgoing forms and documents without using paper. Boost productivity, improve customer service and reduce operational costs.

Integrated and Automated

Eliminate dedicated stand alone fax infrastructure. Protect sensitive information like company documents and customer information as faxes no longer sit idly on the fax machine. Link fax into existing customer relationship management (CRM), enterprise resource planning (ERP) and financial systems. Replace manual faxing with automated distribution of invoices, notices and forms.

Benefits:

For the Individual

Works in your existing email – simple and user-friendly. Faxes sent to your MyFax number are instantly forwarded to your email address as attachments, and can be received at up to five separate email addresses, allowing you to access faxes when ever you check your email. Send faxes from work, home and PDA. PDF fax delivery – receive faxes in either TIF or PDF format. Turn your existing email network into an inbound private fax mailbox that never runs out of paper, loses an important message, or gets turned off – and it's completely confidential. Fax to multiple numbers at once and send multiple faxes at once. Send faxes with confidence – auto-retry and email confirmation ensures your fax goes through. Fax from Microsoft® Office 2003 and 2007, Lotus®Notes® or ACT!®

For the Administrator

Rapid low-cost rollout – no training necessary – MyFax extends email and the web. Use online account-management tools to control accounts: add users, modify accounts, report junk faxes and customize settings and options. Generate real-time billing and usage reports by company, department and employee. Easily recover lost faxes online.

For the IT Professional

Cut costs – eliminate the need for hardware, software and added lines. Benefit from proven security, privacy, reliability, capacity and performance. Rely on live support 24/7. Plus: Extend your solution by integrating fax with other systems. Use open XML or SMTP interfaces. Receiving high volumes of faxes? Streamline processes without manual scanning. Sending high volumes of faxes? Eliminate manual effort by automating faxing.

Quality. Reliability. Service.
